Summary

Fullstack JavaScript Developer with 2 years of experience building commercial web applications using React/Next.js and Node.js/NestJS. Specialized in developing products from scratch and modernizing legacy systems. Designed and delivered an e-commerce platform with a scalable Feature-Sliced Design (FSD) architecture and a NestJS backend. Successfully modernized a legacy Bitrix-based project by replacing its core CMS functionality with a custom Google Sheets API solution for content management.

Experience

Fullstack JavaScript Developer

Freelance

June 2024 - Present

Developing end-to-end web applications for small businesses and startups, covering architecture design, implementation, deployment, and ongoing maintenance.

Key Projects

«Smola flower» — E-commerce SPA

- Developed a full-stack e-commerce application from scratch using Next.js for the frontend and NestJS for the backend, improving page performance and SEO through SSR/ISR.
- Designed and implemented a scalable frontend architecture based on Feature-Sliced Design (FSD), simplifying feature development and long-term codebase maintenance.
- Built the backend with CRUD operations, DTO validation, Supabase (PostgreSQL) integration, and wrote Jest unit tests for core modules.
- Integrated the Telegram Bot API (Telegraf) to automate order notifications and streamline order processing.

«Paint.kg» — Legacy MPA Refactoring

- Led the refactoring and modernization of a legacy Bitrix B2B/B2C website, transforming it into a modern and user-friendly online store.
- Designed and implemented a hybrid architecture, replacing the Bitrix content management workflow with a Google Sheets API solution that enabled non-technical managers to update the product catalog independently.
- Integrated a Telegram Bot for processing orders directly from the shopping cart, significantly simplifying the client's sales workflow.

«PUBG weapons hub» — React SPA

- Developed an advanced weapon build configurator featuring a custom Score Engine for dynamic calculation and ranking based on multiple in-game parameters.
- Implemented an attachment compatibility system and interactive performance visualizations using Recharts, optimizing complex client-side calculations with useMemo.
- Built a fully responsive interface using Next.js App Router and Tailwind CSS, ensuring a seamless user experience across desktop and mobile devices.

Technical Skills

Frontend: TypeScript, React, Next.js, Vue, Redux, Zustand, Tailwind CSS, Ant Design

Backend: Node.js, NestJS, Express.js *Databases:* PostgreSQL, MySQL, Supabase

Tools & Technologies: Git, Webpack, Vite, Jest, REST API, JWT, Telegram API

Education

Academy of Tourism

Bachelor's Degree in Management

2018-2022

Additional Education

MetaLabs

Fullstack JavaScript Developer (One-Year Program)

2024
